---

Obsessed Networking Enthusiast with an impressive network infrastructure lab. Ready to apply my acquired expertise in networking, all while embracing new experiences to further my professional development and continue my addiction to learning new technologies related to Networking.

## Network Experience

### CCNA Home Lab

- Built a network lab in Packet Tracer to simulate a robust network infrastructure.
- Utilized Network Fundamentals and Security.
- Implemented of advanced network access features like VLAN segmentation, trunking, EtherChannel, Spanning Tree Protocol, and Router-on-a-Stick.
- Configured IP connectivity aspects such as a DHCP server, ipv6 connectivity and dynamic routing protocols (OSPF and EIGRP).

June 2023

### AUTOMATION PROJECT: Webex Bot

- Developed a dynamic Webex Bot using Python and Flask.
- Automated network changes using Netmiko.
- Implemented ngrok ensuring secure external access to the Flask server.

June 2023
